PowerPlay™

Electrical/Datacom Multi-Tools for Cable Installers

Purchase a large 30-tool PT540 PowerPlay™ and get a FREE compact 18-Tool PT510 multi-tool. Customized for wire and cable pros, Paladin Tools® and SOG Specialty Knives packed the stainless steel PT540 with 30 tools for electricians and VDV installers. It features smooth one-hand opening, Compound Leverage™ for power, PowerLock™ to lock folding tools in place and handle covers for extra comfort. Dual-function wire cutter/stripper in plier jaws has a StopLock lever. When disengaged, pliers cut and grip normally, except 12-, 14-, 16-AWG strippers are part of wire cutter to cut even 10-AWG Romex. Engage StopLock lever, and plier jaws become a precision stripper for 12-, 14- and 16-AWG wire. Includes leather sheath.

CrimpALL™

RG59/6 Coax Tool Frame

Crimper's ergonomic features improve productivity and comfort. Angled head prevents awkward wrist bending. Reduced handle grip distance is comfortable for small or large hands. Produce higher crimp force with lower hand force so you won't tire quickly. No breakover hand force to make the last click is required. Ergonomic design with soft rubber handles is comfortable to use. Tool delivers over 50,000 crimp cycles. It features ultra-smooth, fully ratcheting cycle with built-in safety release, double-plated jaw and EZI-Change® die screws. Choose from seven complete tools with the die set inserted. Or order a tool frame and individual interchangeable die sets separately.

SPC595Kit

Pro Contractor Installation

Unique kit is designed for telecom, datacom, phone switch and PBX installers. Use the SPC595 to troubleshoot, repair, terminate, punch down blocks, splice and install. You get such essential tools as modular crimp tool with RJ11 and RJ45 modular plugs and punch-down tool with EverSharp 110 and 66 blades. Includes cushion-grip drivers, slotted and screwdrivers plus nutdrivers. Other useful items are tone/probe kit, electrician's scissors, splicer's knife and Need-L-Lock crimp pliers for IDC connectors. Also flashlight, parts box, staple gun with insulated staples, telephone line tester and wire stripper. Use DeWalt 30-piece Rapid Load™ Set with optional cordless drill. All tools listed below come organized in a sturdy soft-sided tool box.

Large soft-sided tool box has 24 pockets inside and out, padded rubber web handle and adjustable shoulder strap. The 4.4-pound kit is 18" x 9" x 12".

Order the -99 kit that includes the recommended Fluke Networks' TS30™ Line-man's Test Set, Fluke 117 DMM and DeWalt DC980KA Cordless ⅜" Drill/Driver Kit. For the kit with the TS30 option, specify -10. To add only a 117 DMM, order -04. Choose the -06 version for the kit with a DC980KA drill.

SPC970BP

Basic A/V Installation Kit

Designed by installers for contractors and installers, SPC970BP features the perfect selection of residential data, signal and voice essentials. Basic A/V kit contains CAT 5 tools, compression tools, connectors and electronics testers. Install and maintain CATV, LANs, twisted-pair, coax and Ethernet cabling, voice and CAT 5 data, CAT 6, HDTV and telecom networks. Our A/V kit design ensures that you always have the correct tool in the proper place, which means no more lost tools. Everything comes organized in a hands-free backpack case with a winged pallet.

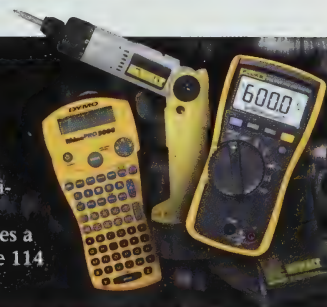

SPC970BP's black ballistic nylon backpack with padded straps provides hands-free transport and ultimate comfort. A winged pallet has three surfaces of tools secured by a clasp. The case features two exterior zipper pouches and an interior document pouch. At 16.5 pounds, the kit is 14" x 17.75" x 7.25". Order the -90 version kit that includes the recommended DeWalt DW920K-2 Screwdriver Kit, Dymo Rhino 5000 Labeler and Fluke 114 DMM.

Wired Wireless Test Kit

For Installers and Technicians

Use the two-instrument KP255 test kit to set up wired and wireless applications. TP350 Testifier™'s large LCD shows a clear picture of wired data, coax, phone, security/alarm or unterminated site wire. A built-in tone generator finds and fixes on exposed or hidden cable. The TP150 Wi-Net Window™'s LCD shows all critical information. Kit includes cables, connectors, #1 coax remote and manuals in a nylon zipper case.

Coax Mapper

For CATV/Security Installation

Hand-held Test-Um Coax Mapper tests multi-run coax cable systems terminated with F-connectors from a central source. Find and identify up to four coax cable connections at a time from the cable box. Built-in tone generator can put a tone signal on a coax cable plus find and identify multiple cables connected to a coax splitter. Test typical

resistance cables up to 3000' long. With four unique identifier test terminators, it's ideal for mapping coax installations. Includes four color-coded F-connectors (#1 brown, #2 red, #3 orange and #3 yellow), four BNC adapters and 6-V battery.

Hand-Held TDR

Includes a Cable Length Meter

The Megger® TDR900's TDR finds distance to opens or shorts while the meter measures cable lengths from 15' to 10,000'. Use this test tool on any cable with at least two insulated metallic elements. One may be cable sheath or shield. Autoranging meter's automatic internal matching networks test 25-, 50-, 75-, 100-, 125- or 150-Ω cables with auto output impedance control. They correspond to power, telephony, CATV and LAN cables. Unit is powered by four AA batteries. Includes alligator clip adapter, soft case and manual.

REPLACE UP TO SEVEN TRADITIONAL TESTING TOOLS

What Does "Triple Play" Mean?

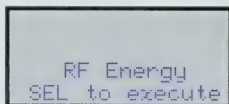

This new buzz word refers to three services (voice, data and video) customers require today. They travel over premise cabling which needs to be tested and qualified to assure good quality signals with adequate capacity. Tri-Porter boasts multi-functional, broad-based capabilities. It's the natural evolution of Test-Um's core strengths (test, talk and trace) in one all-encompassing product. Tri-Porter will make your job of testing and configuring cables easier, faster and more accurate at a fraction of what you'd expect to pay.

Voice (Telephony Testing)

Data (Ethernet Network Testing)

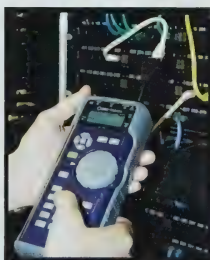

Video (RF Detection/Testing)

Tri-Porter

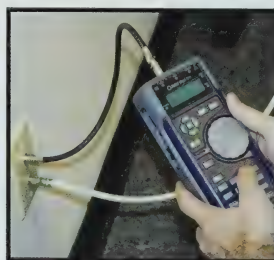

Network Qualifier and Tester

JDSU's Tri-Porter is the only network qualifier and tester you need. It replaces up to seven traditional test tools: DSL-safe telephone test set, network tester, tone generator, cable tester/verifier, tone detector/cable finder, coax mapper plus dB/mV and RF video tester. Test and verify IP-based services in customers' premises in less time more conveniently and economically than ever. Easily qualify voice/telephony lines, network systems and coax runs for service levels to assure optimal performance.

Includes main unit, remote tracer and 20-piece remote wiremapping set in a carrying case. Tri-Porter main unit is powered by six AA batteries. Remote uses a 9-volt battery.

NT955 Validator-NT™ Kit

All-in-One Ethernet Network Management Tool

Use just one tool with four easy steps for professional, productive, profitable installation. Validator-NT™ certifies, identifies, configures and documents Ethernet networks. It defines jobs, makes tests, prints results and stores data. This powerful planning and certification tool measures and presents fast, clear speed and performance results up to 1 Gigabit.

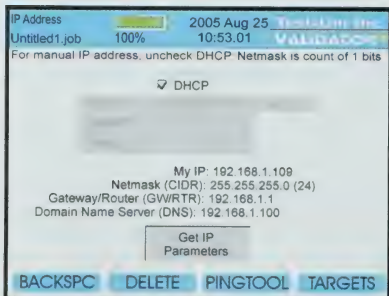

Custom Plan-Um™ design layout software lets you lay out floorplans, document and print test results plus archive jobs for future reference. It ties together all cable criteria in complex voice/data/video installations. Then it presents concise information in printed reports while storing data for future use.

Includes main unit, smart remote, two li-ion rechargeable long-life batteries, two ac adapters/chargers, four test connectors (eight-position shielded modular data jack, six-position modular telephone jack, F-coax video plus security, speaker, etc. dual banana jack), USB cable, CompactFlash® card, Plan-Um® design layout software, 100 cable certification labels, eight remote identifiers and two RJ 45 sacrificial cable modules in a deluxe cushioned carrying case.

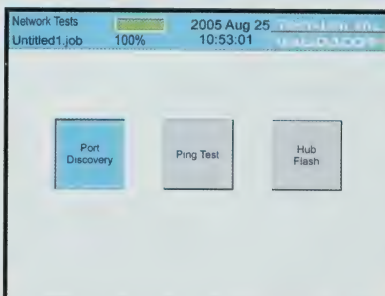

NT955 Validator-NT

Magnepull

Cable Retrieval System

Magnepull reduces cable installation time by as much as 70% compared to standard fish tape. Replace skill-based wire fishing with this easy process that can be learned in just an hour. Two-part system gives technician complete control over coupling cable-pulling device magnetically through drywall. When properly connected, retriever can remain suspended on wall without support. Works with metal studs, in insulated walls, through insulation and under carpet. Includes retriever, flex leader bullet magnet with eye, drop chain, training DVD and instructions in a plastic case.

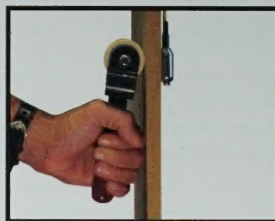

Magnepull Cable Retrieval System

849X100 Reg Price ~~\$139.95 ea.~~ **Promo Price \$125.00 ea.**849X045 LS5800A-3 Repl. Bullet Magnet with Flex Tail Leader **32.00 ea.**849X050 LS5800A-3-1 Optional Short Bullet Magnet with Eye **20.00 ea.**

DROP the leader magnet connected to a cable through a hole in the wall against the wallboard.

LOCATE the leader magnet by moving the retriever unit down the wall in a zigzag motion.

CONNECT the retriever unit to the leader. You will be able to feel them couple through the wall.

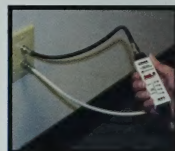

RETRIEVE the cable by pulling the retriever unit and leader magnet through the outlet hole.

JackTest²

UTP/Coax Tester

JackTest² handles LAN and coax cable testing with their associated connections.

Dual-purpose unit's colored LEDs isolate common wiring problems at a glance. Use LAN end to test TIA/EIA568A and 568B LAN wiring standards. LAN plug detects absence of a given pair's closed conductive loop inside LAN jack under test. Use it on modular jacks with eight contacts such as RJ-45. Continuity testing from the coax end distinguishes one RG59 coax cable run from another when used with the included terminator.
